Introduction to Oceanography  
Biology 342  
Fall, 2021  
(in the year of the delta)

Lecture: Rita 103: T&Th: 09:25-10:40  
Laboratory: GML 202/113: Tues 14:05-17:05 and Th 14:05-17:05  
Lecturer: Dr. Jack DiTullio: GML Office Rm. 204; phone: 953-9196 (ditullioj@cofc.edu)  
Lab Instructor: Nicole Schanke: HML, D109; phone: 460-9825  
[DiTullio Office hours: T&Th by appointment]

This schedule is a general outline of the material that will be discussed each day. Please note, however, we will probably deviate from it somewhat as the course progresses. The outline is simply meant to be an overview of the topics to be discussed in roughly the order they will be covered. Some topics may take more time than listed. Please remember to wear your masks inside the classroom and at GML until further notice.

Course Objective: To introduce the student to all aspects of general Oceanography including: Geological, Physical, Chemical and Biological Oceanography. Additional lectures not covered in the textbook will address the importance of the oceans in biogeochemical cycling of various elements as well as their effect on global climate change. The lab sections will involve both problem sets as well as analytical work. Lab projects will be completed and the results will be presented to the class.

Student Learning Outcomes:

- Students will gain an understanding of how various sub-disciplines of oceanography are inter-related and the importance of employing a multidisciplinary approach.
- Students will gain field experience in collecting oceanographic samples and data using a CTD system in Charleston Harbor.
- Students will learn how to analyze seawater for various chemical components including nutrients such as nitrate, phosphate and silicate.
- Students will learn how to measure acidification of seawater by determining
various components of the carbonate system (e.g. alkalinity, pH and carbonate concentration)

- Students will gain experience in identifying live plankton species from Charleston Harbor.
- Students will demonstrate an ability to interpret and synthesize oceanographic datasets and present analytical results in a power point presentation.

Course Grading:
Exam I ___________________ 20%
Exam II ___________________ 20%
Labs ___________________ 35%
Final ___________________ 25%

The first 2 exams will cover material from the preceding section only. The final exam, however, will be cumulative but ~ 75% of final will come from the last third of lectures. Exams will cover all assigned readings as well as lecture material. Exam questions will include definitions, short answers and short essay questions. Please note that class attendance is strongly advised as lectures will sometimes include a significant amount of material not covered in the text. Final grades will be determined according to the following scale:

A = 93-100
A- = 90-92
B+ = 87-89
B = 83-86
B- = 80-82
C+ = 77-79
C = 73-76
C- = 70-72
D+ = 67-69
D = 60-66
F = 0-59

Instructor Evaluation:
Please note that approximately 15 min will be allocated for students to bring in their electronic devices to fill out an instructor evaluation form on a mutually agreed-to scheduled date near the end of the course.

Laboratories:
The labs will be held in GML Rm. #202 and 113. Lab reports will be due one week after they are assigned unless otherwise noted. Late lab assignments will lose 10% of the maximum grade per week. No write-ups will be accepted more than 2 weeks late. A field trip to Charleston Harbor and associated estuaries aboard the R/V Discovery is
scheduled tentatively for the afternoons of September 21 and 23, 2021 (weather permitting). More details about the cruise will be provided the week before the cruise. Group presentations investigating hydrology of ocean basins using the Ocean Data View (ODV) software will be due on October 12 and 14, 2021. Each student will also prepare a 5-7 page paper (double spaced) on a current oceanographic topic of interest. The topics will need to be approved before fall break by the instructor. Peer reviewed papers should be part of the bibliography. The deadline for submission is on or before December 02, 2021. In-lab presentations of current event topics will be on November 30 and December 2, 2021.
The labs will meet on Tuesdays or Thursdays at the Grice Marine Lab in Fort Johnson (James Island) in Rm #202 and #113 from 1405 to 1705 hr. Please report to room 202 first unless otherwise specified. Some lab periods will also include a short lecture. There will be a class field trip aboard the R/V Discovery on September 21 and 23, 2021. Always wear closed-toed shoes for all field work especially when working on boats. All Lab reports must be turned in the following week. Late lab reports will be penalized 10% per week. A group ODV project will be due as a presentation on Oct 12/14. A 5-7 page Current Events paper will also be due with a presentation on Nov 30 and Dec 02. The requirements for the ODV presentation and Current Events Special Topics presentations will be discussed during the first lab period.

College Policies:

1. **Center for Student Learning**: I encourage you to utilize the Center for Student Learning’s (CSL) academic support services for assistance in study strategies, speaking & writing strategies, and course content. They offer tutoring, Supplemental Instruction, study strategy appointments, and workshops. Students of all abilities have become more successful using these programs throughout their academic career and the services are available to you at no additional cost. For more information regarding these services please visit the CSL website at [http://csl.cofc.edu](http://csl.cofc.edu) or call (843)953-5635.

2. **Center for Disability Services** ([http://disabilityservices.cofc.edu/for-faculty/faqs.php](http://disabilityservices.cofc.edu/for-faculty/faqs.php))
   - Any student eligible for and needing accommodations because of a disability is requested to speak with the professor during the first two weeks of class or as soon as the student has been approved for services so that reasonable accommodations can be arranged.
   - The College will make reasonable accommodations for persons with documented disabilities. Students should apply for services at the Center for Disability Services/SNAP located on the first floor of the Lightsey Center, Suite 104. Students approved for accommodations are responsible for notifying me as soon as possible and for contacting me one week before accommodation is needed.
   - This College abides by section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. If you have a documented disability that may have some impact on your work in this class and for which you may require accommodations, please see an administrator at the Center of Disability Services/SNAP, 843.953.1431 or me so that such accommodation may be arranged.

3. **College of Charleston Honor Code and Academic Integrity**

   Lying, cheating, attempted cheating, and plagiarism are violations of our Honor Code that, when suspected, are investigated. Each incident will be examined to determine the degree of deception involved.

   Incidents where the instructor determines the student’s actions are related more to a misunderstanding will be handled by the instructor. A written intervention designed to help prevent the student from repeating the error will be given to the student. The intervention, submitted by form and signed both by the instructor and the student, will be forwarded to the Dean of Students and placed in the student's file.

   Cases of suspected academic dishonesty will be reported directly by the instructor and/or others having knowledge of the incident to the Dean of Students. A student found responsible by the Honor Board for academic
dishonesty will receive a XXF in the course, indicating failure of the course due to academic dishonesty. This status indicator will appear on the student’s transcript for two years after which the student may petition for the XX to be expunged. The F is permanent.

Students should be aware that unauthorized collaboration—working together without permission—is a form of cheating. Research conducted and/or papers written for other classes cannot be used in whole or in part for any assignment in this class without obtaining prior permission from the instructor.

Students can find the complete Honor Code and all related processes in the Student Handbook at:
http://studentaffairs.cofc.edu/honor-system/studenthandbook/index.php

4. SAFETY POLICY AND PROCEDURES
The School of Sciences and Mathematics of the College of Charleston understands that the safety of our students, staff and faculty is of paramount importance. Engendering a safety culture is an important part of our mission in teaching and doing science. Each department, course of instruction, or research lab may require higher standards or procedures. The policies and procedures set forth below are understood to be minimum requirements across our departments.

In this document, the term “laboratory” is meant for a work space/facility where chemicals, biological agents, or equipment is used for research and/or instruction. No one (student, staff, faculty, or visitor) will be allowed in a laboratory (teaching or research) to perform experiments or where experiments may be in progress unless these regulations are followed. Students dismissed from a teaching lab due to violations of the safety procedures will not be allowed to re-enter the laboratory until authorized to do so by their supervisor (instructor) and, in the case of research laboratories, by the department chair or designee. Any course work missed because of a violation of these guidelines cannot be made up at another time (or by an extension of the lab period) and will be treated as an unexcused absence.

1. You are responsible for knowing the biological, chemical, electrical, ergonomic, mechanical, and physical hazards associated with the equipment and materials that are being utilized in the laboratory. Listen to all instructions and ask questions about that which you do not understand.
2. Know the location of safety equipment: telephones, emergency shower, eyewash, fire extinguisher, fire alarm pull. 3. Know the appropriate emergency response procedures. If there is an injury or emergency, call 953-5611.
4. Do not work alone in the laboratory if you are working with hazardous materials or equipment.
5. Use hazardous chemicals, equipment, and biological agents only as directed
and for their intended purpose.
6. Do not engage in horseplay, pranks or other acts of mischief while in lab.
7. Drinking, eating, and application of cosmetics is forbidden in laboratories where chemicals or biohazards are present. Smoking is forbidden in all College buildings.
8. Appropriate personal protective equipment shall be worn. The dress code for laboratory work when using chemicals, biological or physical hazards, or when instructed to do so by the laboratory supervisor is as follows:
   a) Wear safety glasses or goggles at all times.
   b) No exposed skin on arms, legs or torso.
   c) Wear lab coats or other approved protective garments.
   d) Wear gloves or other personal protective equipment (PPE) as directed by the instructor or mandated by prudent practices based on the chemicals being handled. If in doubt, wear appropriate gloves. Latex is not permitted. Avoid cross-contamination.
   e) Remove PPE (gloves and lab coat) when exiting the laboratory.
   f) Wash your hands, even if gloves were used, before leaving a lab where you did any lab work.
   g) Closed toe shoes are required. The heel and top of foot must be covered. High heeled shoes, sandals, and perforated shoes are not permitted.
   h) Confine long hair and loose clothing.
9. Inspect equipment or apparatus for damage before adding chemical reagents or biological samples or energizing electrical equipment. Do not use damaged equipment.
10. Never remove chemicals, biological samples, or laboratory equipment from a lab without proper authorization.
11. Presume that all chemicals and biological samples used in the laboratory are hazardous for you and the environment, unless instructed otherwise.
12. Never leave an experiment unattended unless proper safety precautions are in place.
13. Read all labels on chemicals twice before using them in the lab. Read all instructions twice for the operation of any equipment or machinery.
14. Properly and safely dispose of all waste materials.
15. Treat sharps and broken glassware containers carefully.
   a) Broken glass should be disposed of in properly marked safety containers. All sharps (needles, razor blades, etc.) used for any purpose must be disposed of in specially labeled SHARPS containers.
   b) Do not place contaminated glass in the broken glassware container. Consult your supervisor.
   c) Waste chemicals and contaminated PPE should be discarded as directed.
16. When using a reagent, replace the lid immediately. Never return unused reagents to stock bottles. Take only the amount needed for your experiment.
17. All chemicals and biological samples/media are to be disposed of in appropriately labeled containers. Specific instructions for each material will be provided. Pay attention to waste container labels before adding the material to be
discarded.
18. Use good personal hygiene. Keep your hands and face clean. Wash hands thoroughly with soap and water after handling any chemical or biological agent.
19. Keep the work area clean and uncluttered with chemicals and equipment. Clean up the work area on completion of an operation or an experiment. Before leaving the laboratory, you are responsible for making sure your lab area is clean and organized.
20. Never store a chemical or biological specimen in an unlabeled container.
20. Always have your College of Charleston identification and insurance information with you when working in a laboratory. MedicAlert identification must be worn if you have any potential life-threatening chemical sensitivities or medical conditions.
21. Report any accident or injury, however minor, to your teaching assistant, instructor, or lab supervisor immediately. An accident report form must be completed and forwarded to the department chair, dean and to the Director of Environmental Health and Safety.

If you have questions/concerns about safety in the lab please first consult your instructor. If these are not answered, please see the department chair. Finally, you may consult the director of Environmental Health and Safety at 3-6802.

5. COVID Policy

If one or more students are absent for an extended period of time due to COVID-19 (quarantine or isolation), the instructors may, at their discretion, conduct the class exclusively online via OAKS for the duration of student quarantine/isolation, record class lessons to share with students, or choose an alternate accommodation that provides the impacted student(s) with the opportunity to continue in the course. The specific accommodation will vary depending on the number of students affected, the expected duration of their absence, and the needs of the class.
